

# Adagio Ledger

**Adagio Ledger provides a complete General Ledger for your business. Batch transaction management ensures only balanced entries are posted to your ledger.**

- Windows-based General Ledger, tightly integrated with Adagio Receivables, Adagio Payables and Time & Billing, and other modules.
- 6 character account and 6 character optional department validated during data entry
- 12 or 13 period fiscal year, with historical and budget figures available for reporting
- De-activate accounts or periods to prevent posting errors
- User-Defined Source Journals to meet specific corporate reporting needs
- Trial Balance and Transaction Listings

Adagio Ledger provides complete General Ledger account management for users of [Adagio Receivables](#) and [Adagio Payables](#). Manage your Chart of Accounts for Assets and Liabilities, Revenue and Expenses. Close your year to a single or multiple Retained Earnings accounts. Adagio Ledger account inquiry allows you to check current account balances, current and historical net posted transactions by period, and budget amounts.

Group your accounts by type for Year-end control. Set up automatic re-allocations of account balances to other accounts or departments. Post transactions in summary or detail format. Date sensitivity makes sure that transactions are posted to the applicable period, or force transactions to a specific period in your fiscal calendar.

Locate account information quickly using Adagio Ledger's customizable grid, or enter your 6 character account code directly. Softrak's SmartScanner™ technology easily locates accounts using their description or other remembered data. Double click on an account to put all its information at your fingertips—description, balance, budget, and transaction information, all in one place.

Provisionally post transactions to verify their impact on your trial balance prior to committing them. Retrieve transactions from your subsidiary ledgers. Year end close automatically creates the correct entries to your Retained Earnings accounts.

Adagio Ledger contains a complete set of reports for file and account management. Report options control selection, sort sequence and subtotaling. Account ranges are user definable. All reports are designed using [Crystal Reports for Adagio](#), Softrak's custom Report Writer, so you may modify them if you wish.

The screenshot displays the Adagio Ledger software interface. On the left, there is a window titled 'Chart of Accounts' showing a list of accounts with columns for account number, description, and type. In the center, there is a window titled 'Edit Account 1000 Amortized Depreciation' with various input fields and buttons. On the right, there is a window titled 'Adagio Ledger - Source Journals' displaying a detailed transaction listing table.

DATE	ACCOUNT	DEPT	AMOUNT	PERIOD	DESCRIPTION	STATUS
