

Inventory

Adagio Inventory is a complete multi-location stock management and control system which tracks purchases, receipts, shipments, returns and adjustments with ease.

- 16 character part number, with user defined segmentation (max. 4 segments), allows powerful reporting
- Moving average, FIFO, LIFO, standard and user specified costing
- Five markup / discount levels by customer type or quantity purchased with date sensitive pricing by customer
- Alternate price lists and part numbers
- Menu level security by Group or User
- Detailed inventory movement log with 13 period sales history and selective history purge
- Extensive range of management reports with broad range of options for selecting, sorting, and subtotaling
- The historical transaction database allows complete analysis of stock valuation changes
- Inquiries into the transaction history can be selected by transaction type, date, location, source, customer or vendor

The screenshot displays the Adagio Inventory software interface. The main window is titled "Item Maintenance" and contains a table of inventory items. Overlaid on this is an "Edit Item" dialog box for item "BKH.UNI001 Women's Via Montega hybrid". A third window, "Display Receipt 1", is also open, showing a receipt table.
