

# Adagio<sup>®</sup> Environment

## Softrak Minimum Requirements:

### ◆ Adagio Version 8.1, 9.0 and 9.1:

- Workstation Operating System: Windows XP, Vista, 7, 8, 8.1  
Adagio is compatible with Windows 8 and 8.1 with the following exceptions and limitations:
  - The Adagio Data Source used by all Adagio modules must be v1.12.54.2623 or higher.
  - Adagio ODBC compatibility has been confirmed for version 9.1A (2013.12.17)
  - Adagio has not been tested in a peer-to-peer environment on Windows 8.x
- Workstation CPU/Memory:
  - Windows Vista/7/8; 2GHz processor; 2GB RAM min., 4GB RAM recommended,
  - Windows XP; 1GHz processor with 1GB RAM
- Workstation Disk Drive: 120 GB minimum, 250GB recommended
- Workstation Display: 1024 x 768 or better.
- Printer: Laser recommended.

### ◆ Adagio Version 9.2:

- Workstation Operating System: Windows Vista (SP2), 7 (SP1), 8, 8.1  
Adagio is compatible with Windows 8 and 8.1 with the following exceptions and limitations:
  - The Adagio Data Source used by all Adagio modules must be v1.12.54.2623 or higher.
  - Adagio ODBC compatibility has been confirmed for version 9.1A (2013.12.17)
  - Adagio has not been tested in a peer-to-peer environment on Windows 8.x
- Workstation CPU/Memory:
  - 3GHz processor; 4GB RAM min., 8GB RAM recommended,
- Workstation Disk Drive: 250 GB minimum, 500GB recommended
- Workstation Display: 1280 x 800 or better.
- Printer: Laser recommended.

## **FOR MULTI-USER NETWORK:**

- Network: 1000 base-T  
Server recommended but peer-to-peer may be used
- Server
  - MS Server 2003, 2008 R1 and R2, 2012 R1 and R2  
(Note: Server 2003 End-Of-Life is 7/14/2015)
  - MS Small Business Server 2003, 2011
  - Windows Remote Desktop Services.

Adagio modules version 9.2A require MS Server 2008 R2 (SP1) or higher if running Remote Desktop Services (Terminal Services). Adagio 9.2A may be installed from a station on a LAN to MS Server 2003 and 2008 R1 used as a file server.

## Micro Management Associates' current additional recommendations for best performance:

- Windows 7 Professional 64 Bit, Core i5 processor, 8GB RAM, 500GB Disk  
*Windows performance degrades exponentially when the workstation runs out of memory or free disk space*
- Laser printer(s)

### **FOR MULTI-USER NETWORK:**

- Name brand file server running MS Server 2008 R2 or 2012 R2
- 1 Gbit switched (high performance) network  
(check sustained throughput specs)  
*Adagio is I/O intensive, therefore, improving the throughput of the I/O channels will have a larger impact on overall performance than increases in computing horsepower. Consider multiple NIC's in your server.*
